

BOOK N95 MASK FITTINGS FOR YOUR STAFF!

Are you looking to provide staff with N95 mask fit testing and proper use methods to better protect yourself, your families and the clients you care for from COVID-19?

The Toronto Developmental Services Alliance (TDSA), in collaboration with Safehaven, is providing N95 mask fit testing free of charge to all staff working in TDSA organizations.

N95 Respirators are personal protective devices that are worn on the face and cover the nose and mouth to reduce the wearer's risk of inhaling airborne particles. A NIOSH-certified N95 respirator filters particles one micron in size, has 95% filter efficiency and provides a tight facial seal with less than 10% leak.

To Register:

Email IPAC-TDSA@safehaven.to to get fitted for N95 masks and to receive the appropriate training on how to use them. Agencies should schedule sessions in groups. The fittings are taking place at Safehaven's Bloor street location (1173 Bloor Street West).

More detailed, step by step information can be accessed by contacting IPAC-TDSA@safehaven.to.
